

Logi Tag™

Discreet RFID tags that withstand liquid immersion, high pressure conditions and extreme temperatures

HID Global Logi Tag™ transponders endure severe conditions while protecting data integrity. These small, thin discs enable discreet placement in a broad range of applications.

The smallest Logi Tag discs are ideal for tagging industrial tools and small equipment. Among the smallest HF tags available, Logi Tag 081 and 121 units are assembled using patented DBond™ Vigo™ technology that enables HID Global to produce tags in thinner, smaller formats without compromising performance. They mount with industrial adhesives, with options for metal or non-metal surfaces. Logi Tag HF transponders are NFC Tag Type 5 compliant when formatted with NDEF data structure. Alternatively, LogiTag 180 is a RAIN® RFID near-field UHF coin to be used with standard EPC-Gen2 equipment.

As part of a commercial laundry logistics system, Logi Tag discs ensure accurate item counting and documentation, while enabling automatic billing and real-time inventory control.

Logi Tag discs enable medical facilities automatically track clothing, linens, rags, surgical sponges, and life-saving equipment.

Effective tracking of reusable assets and verification of cleaning and sterilization procedures ensures better patient and staff safety through improved infection control.

Logi Tag discs are easily sewn into the hem or seam of a garment, uniform, napkin, tablecloth or runner. They may also be affixed to custodial supplies, such as mats, mops, washrags and towels or are used to tag the hangers to automate laundry workflows. The Logi Tag Button 162 transponder is indistinguishable from ordinary buttons, and can be sewn onto clothing with standard stitching equipment and processes.

Logi Tag transponders empower logistics applications via radio frequency identification (RFID) technology, enabling more accurate, efficient asset management and inventory control processes. LogiTag 161 is also available in a radiation resistant, high-memory FRAM option for most demanding application scenarios. Some HF LogiTag 161 (see PN “-EX”) are ATEX and IECEx certified for use in explosive environments.

KEY BENEFITS:

- **Inconspicuous** – Compact form factors conceal easily in textile assets, hand tools or small equipment.
- **Durable** – Resistant to extreme temperature, chemicals, fluids, industrial detergents and high pressure.
- **Powerful** – Rapid, accurate asset identification and data storage, with anti-collision functionality for simultaneous processing of multiple items.

TECHNOLOGY HIGHLIGHTS:

- LF 125 kHz, HF 13.56 MHz / NFC or UHF near-field
- 64-bit UID; up to 8KB read-write user memory, crypto options (Vigo™ 2K)
- Anti-collision, multi-read capable (HF)
- High chemical and mechanical resistance
- Temperature resistant up to 347° F (175° C)
- Options for mounting on metal or non-metal surfaces, or radiation resistant FRAM

APPLICATION AREAS:

ASSET TRACKING AND LOGISTICS

- Inventory
- Tools and small equipment

LAUNDRY

- Automated accounting of cleaning
- Automated sorting and inventory
- Clothing, uniforms
- Commercial laundry
- Owner identification

MEDICAL AND HEALTH

- Hospital laundry
- Medical and surgical accessories
