PRODUCT

Dipole TIMING is a family of RFID tags that allows to time all kinds of sports tests: marathons, popular races, triathlons, sky tests, cycling, motocross, etc.

Dipole's RDFI labels are the finest and most accurate on the market. They Are available in thicknesses from 0.25 to 5mm. They Have been designed to achieve a reading fidelity ratio of 99.99%. All our Dipole TIMING tags are made with moisture-resistant adhesives.

Benefits

- > Reliability for any
- > Resistant: rain, sweat, temperature
- > Customizable: with logo and information
- > Real-time information

Product details

Dimensions
100 x 30 mm
Fully customizable

Material
Foam 0,8/1,5/2/3/4/5 mm
Plastic

Adhesive
Good resistance
humidity

Temperature
-40 °C / +85 °C

IC type
Monza R6-P / Ucode 8

International standards
ISO 18000-6C
Class 1 Generation 2
passive UHF

Frequency
Global 860 - 960 MHz

Memory
128 bit EPC + 32 bits user
96 bit EPC + 64 bit user

Read range
Up to 10 m.

Preferred uses

The ideal use of dipole TIMING is the timing and control of people in sport events:

- > Popular racing
- > Marathon
- > Rails
- > Triathlon
- > Cycling
- > Winter sports
- > Motorcycling
- > Motor racing
